**NOTICE OF REVISIONS TO PERMITS TO OPERATE FOR
GASOLINE DISPENSING FACILITIES WITH UNDERGROUND STORAGE TANKS**

The San Diego Air Pollution Control District (District) has revised Attachment K, “Certification Requirements for Technicians”, of Permits to Operate issued for gasoline dispensing facilities equipped with underground storage tanks.

Effective March 1, 2008, the San Diego Air Pollution Control District will require all vapor recovery contractors to pass this examination prior to installing, repairing or testing any vapor recovery system or component. An advisory regarding this requirement was mailed to all effected permit holders in August 2007, and can be found on the District’s website at <http://www.sdapcd.org/rules/advise/VRcertinfo.pdf>. The ICC certification requirement has been added to Attachment K of their District Permit to Operate.

Attached is the revised Attachment K which shall be maintained onsite with your Permit to Operate and made available to the District upon request.

If you have any questions regarding the revised Attachment K or the new requirements, please contact Randy Smith at (858) 586-2677.
