FOR YOUR INFORMATION

The Following Notice was Published by the District

NOTICE OF EXTENSION OF COMMENT PERIOD
FOR A PRELIMINARY DECISION TO
APPROVE A SOURCE OF AIR POLLUTION BY THE
SAN DIEGO AIR POLLUTION CONTROL DISTRICT AND
AVAILABILITY OF REVISED PROPOSED PERMIT CONDITIONS

The San Diego County Air Pollution Control District hereby gives notice that it has extended the period of time to provide written comments on the Air Pollution Control Officer’s preliminary decision, to approve the Gregory Canyon Landfill (District Application No. APCD2007-APP-985364), until September 5, 2013.

Gregory Canyon Landfill is a proposed Class III municipal solid waste (MSW) disposal facility, located at 9708 Pala Road, Pala, CA, 92059, on property owned by Gregory Canyon, Ltd., the project applicant. The site is located in northern San Diego County, approximately three miles east of Interstate 15 (I-15) and two miles southwest of the community of Pala. SR 76 and the San Luis Rey River run east-west through the landfill property. The proposed landfill footprint itself is located approximately in the center of the property south of SR 76 and the San Luis Rey River in Gregory Canyon. The total site area is 1,770 acres. Of that area, 308 acres are permitted for use for landfill activities. The proposed landfill footprint, where waste will be deposited, has an area of 183 acres.

The District performed an evaluation of the air pollution impacts of this proposal, and the landfill is expected to operate in compliance with all applicable District Rules and Regulations and all applicable federal requirements that the District is authorized to implement. The proposed permit incorporates conditions necessary to ensure compliance with all District requirements, and all federal and State requirements the District is authorized to implement.

The proposed permit conditions would allow the new equipment to potentially emit a maximum of 16.4 tons per year of oxides of nitrogen, 39.7 tons per year of carbon monoxide, 49.5 tons per year of volatile organic compounds, 95.0 tons per year of particulate matter less than or equal to 10 microns in diameter, and 43.8 tons per year of oxides of sulfur.

The District is continuing to seek comments on this proposed permit action. Written comments concerning the District’s proposed action, including revisions or additions to comments already submitted, may be submitted through September 5, 2013. Please direct your comments to the attention of Steven Moore, Air Pollution Control District, 10124 Old Grove Road, San Diego, CA, 92131. Documents relating to the proposed action are available for public review at this address. Revised proposed permit conditions and certain supporting documents are available on the District website at http://www.sdapcd.org/homepage/public_part/notices/notices.html.
Should you have any questions regarding this notice or wish to make an appointment to review documents related to this action, please contact Steven Moore at (858) 586-2750 or via e-mail at steve.moore@sdcounty.ca.gov.
