FOR YOUR INFORMATION

The Following Notice was Published by the District

NOTICE OF PRELIMINARY DECISION TO APPROVE APPLICATIONS FOR EMISSION REDUCTION CREDITS BY THE SAN DIEGO COUNTY AIR POLLUTION CONTROL DISTRICT

The San Diego Air Pollution Control District hereby gives notice that in accordance with Rule 26.0 of the District's Rules and Regulations, the Air Pollution Control Officer has made a preliminary decision to approve an application for emission reduction credits, submitted by Koch Membrane Systems, Inc. The application was for the shutdown of the operations previously permitted under Permits to Operate Nos. 004485, 930201, 930393 and 950937, located at 10054 Old Grove Road, San Diego, CA. Permits to Operate Nos. 004485, 930201 and 950937 were each issued for a reverse osmosis membrane coating line using solvent dip tanks. Permit to Operate No. 930393 was issued for a cold solvent dip tank operation. This shutdown has been evaluated to create 4.786 tons/year of actual emissions reductions for volatile organic compounds (VOC).

The District has determined that these reductions are real, surplus, enforceable, quantifiable and permanent when all conditions imposed by the District are complied with, and therefore the credits will be classified as "class A emission reduction credits". These credits are transferrable in whole or in part, and are eligible for use as emission offsets pursuant to all District rules and regulations.

The evaluation of this application is available for review at the Air Pollution Control District, 10124 Old Grove Road, San Diego, CA 92131. Please refer to Application No. APCD2013-ERC-000025, on all correspondence regarding this project. Written comments concerning the District's proposed action may be submitted for a period of 30 days, commencing May 12, 2014, and ending on June 11, 2014. Questions regarding this notice may be directed to Kevin Sung at (858) 586-2735 or via e-mail to Kevin.Sung@sdcounty.ca.gov.
