NOTICE OF PRELIMINARY DECISION TO APPROVE
AN APPLICATION FOR EMISSION REDUCTION CREDITS BY THE
SAN DIEGO AIR POLLUTION CONTROL DISTRICT

The San Diego Air Pollution Control District hereby gives notice that in accordance with Rule
26.0 of the District's Rules and Regulations, the Air Pollution Control Officer has made
preliminary decision to approve an application for emission reduction credits submitted by
Kyocera America, Inc. This application was for the shutdown of four natural gas fired internal
combustion engines, located at 8611 Balboa Ave., San Diego, CA 92123, used for cogeneration
operation. This shutdown has been evaluated to create 16.7 tons/year of actual emissions
reductions for oxides of nitrogen (NOx) and 7.6 tons/year of actual emissions reductions for
volatile organic compounds (VOC).

The District has determined that these reductions are real, surplus, enforceable, quantifiable and
permanent when all conditions imposed by the District are complied with, and therefore the
credits will be classified as "Class A Emission Reduction Credits". These credits are
transferrable in whole or in part, and are eligible for use as emission offsets pursuant to all
District rules and regulations.

The evaluation of this application is available for review at the Air Pollution Control District,
10124 Old Grove Road, San Diego, CA 92131. Please refer to Application No. 2012-APP-002110 on all correspondence regarding this project. Written comments concerning the District's
proposed action may be submitted for a period of 30 days commencing October 31, 2012, and
ending on November 29, 2012. Questions regarding this notice may be directed to Nick Horres
at (858)586-2728 or via email to Nick.Horres@sdcounty.ca.gov, or John Annicchiarico at (858)
586-2733.
