### NON-MUNICIPAL INCINERATORS

**COMPANY NAME:**

**EQUIPMENT ADDRESS:**

#### A. EQUIPMENT DESCRIPTION

- **Mfr:**
- **Model:**
- **S/N:**

- **Rated Throughput:** lbs/hr
- **Proposed Throughput:** lbs/hr

- **Proposed Equipment Use:**

<table>
<thead>
<tr>
<th>Internal Dimensions:</th>
<th>Primary Chamber</th>
<th>ft.</th>
<th>ft.</th>
<th>ft.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Secondary Chamber</td>
<td>ft.</td>
<td>ft.</td>
<td>ft.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Operating Temperatures:</th>
<th>Primary Chamber</th>
<th>°F</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Secondary Chamber</td>
<td>°F</td>
</tr>
</tbody>
</table>

- **Type of Burner Fuel:**

- **No. of Primary Burners:**
- **Mfr.:**
- **Model:**

- **Rated Heat Input to Primary Chamber:** mm BTU/hr

- **No. of Secondary Burners:**
- **Mfr.:**
- **Model:**

- **Rated Heat Input to Secondary Chamber:** mm BTU/hr

- **Loading Mechanism:**
  - [ ] Ram Feed
  - [ ] Chute
  - [ ] Hatch

- **Method of Ash/Residue Disposal:**

- **Operating Schedule:**
  - hrs/day
  - days/week
  - weeks/year

#### B. AIR CONTAMINANTS

- **Describe how exhaust emissions are controlled:**

---

Rev. 5/03 1 of 3 (14 A, B, C) OVER
Describe any in-stack emission control devices: ________________________________

Exhaust Gas Composition:
- Volumetric Flowrate: _______ Actual Ct. Ft./Min  Temperature: _______ °F
- Carbon Dioxide Concentration: _______ % by Volume
- Particulate Grain Loading: _______ gr/dscf @ 12% CO₂
- Total Hydrocarbons: _______ ppmve 12% CO₂

Exhaust Fan Mfr: ________________________________  Model: ________________________________
S/N: ________________________________  Capacity: _______ Std. Cu. Ft./Min

Provide manufacturer's specifications and a drawing of the incinerator and emission control device showing sensor and burner locations, fan location, and exhaust stacks. Also provide a narrative of how the equipment is operated including maintenance and safety procedures.

C. RULE 1200 TOXICS EVALUATION:
A refined toxics evaluation is not required for crematories if the facility uses propane or natural gas as fuel and annually cremates less than 300 human bodies or 43,200 lbs of remains (human or animal).

FACILITY SITE MAP Please provide a copy of a Thomas Bros. Map showing the geographic location of your facility. This helps by making it possible for the District to use a Geographic Information System to identify community residents and workers who may be impacted by emissions from your facility.

PLOT PLAN Please also provide a facility plot plan or diagram (need not be to scale as long as distances of key features from reference points are shown) showing the location of emission point(s) at the facility, property lines, and the location and dimensions of buildings (estimated height, width, and length) that are closer than 100 ft. from the emission point. This diagram helps by making it possible for the District to efficiently set-up the inputs for a health risk evaluation. Inaccurate information may adversely affect the outcome of the evaluation.

EMISSION POINT DATA Determine if your emission source(s) are ducted sources or if they are unducted/fugitive sources and provide the necessary data below. (Examples of commonly encountered emission points: Ducted or Stack Emissions - an exhaust pipe or stack, a roof ventilation duct; Unducted Emissions - anything not emitted through a duct, pipe, or stack, for instance, an open window or an outdoor area or volume.)

1. Ducted or Stack Emissions (For 1 or more emission points). Estimate values if you are unsure.

<table>
<thead>

<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

* Use “70 °F” or “Ambient” if unknown
2. **Unducted Emissions** (For 1 or more emission points). Estimate if you are unsure.

Describe how unducted gases, vapors, and/or particles get into the outside air. Provide a brief description of the process or operation for each unducted emission point. If unducted emissions come out of building openings such as doors or windows, estimate the **size of the opening** (example – 3 ft x 4 ft window).

If unducted emissions originate outside your buildings, estimate the **size of the emission zone** (example - paint spraying 2’ x 2’ x 2’ bread boxes).

---

**RECEPTOR DATA**  A receptor is a residence or business whose occupants could be exposed to toxic emissions from your facility. In order to estimate the risk to nearby receptors, please provide the distance from the emission point to the nearest residence and to the nearest business.

Distance to nearest residence _______ ft
Distance to nearest business _______ ft

Name of Preparer: ____________________________  Title: ____________________________

Phone No.: (___) ________________  Date: ____________________________

**NOTE TO APPLICANT:**

Before acting on an application for Authority to Construct or Permit to Operate, the District may require further information, plans, or specifications. Forms with insufficient information may be returned to the applicant for completion, which will cause a delay in application processing and may increase processing fees. The applicant should correspond with equipment and material manufacturers to obtain the information requested on this supplemental form.
