

**METAL PARTS & PRODUCTS COATING (<10 gal/day)**  
**Fee Schedules 27J and 27K**

Review the BACT Control Option listed below. The applicant must propose the Control Option listed or perform a Top-down BACT Analysis as described in Section 4 to justify the selection of another Control Option. The applicant will be required to provide documentation that the Control Option selected meets the requirements listed in the table.

	VOC	NOx	SOx	PM
<b>BACT Emission Rate Limit</b>	Not Determined	(N/A)	(N/A)	Not Determined
<b>BACT Control Option</b>	Compliance with Rule 67.3, Metal Parts & Products Coating Operations. (A/P)	(N/A)	(N/A)	Spray booth equipped with overspray filters. (A/P)

The applicant may choose to limit the Potential to Emit (PTE) from the equipment to less than 10 pounds per day for each pollutant in lieu of meeting the stated BACT requirement.

*(This table does not apply to operations applying, on average, 10 or more gallons of coating per day.)*
