

ATTACHMENT CC: List of Solvents for Petroleum Dry Cleaning Operations

The following solvents have been evaluated by the District and found acceptable for Petroleum Dry Cleaning Operations use. Note that other solvents may be evaluated by the District at the manufacturers' or a facility's request.

For the purposes of this document, "solvent" includes all materials containing Volatile Organic Compounds (as defined by District Rule 2), which shall include the following materials identified as dry cleaning fluids and detergents.

The combined volume of solvents (including dry cleaning fluids and detergents) for each petroleum dry cleaning machine shall not exceed the usage limitation found below in any consecutive twelve (12) month period.

Approved Solvents			
Type of Material	Manufacturer	Product Name	Combined Usage (gallons)
Dry Cleaning Fluid	ExxonMobil	DF-2000	450
Dry Cleaning Fluid	Chevron Phillips Chemical	ECOSOLV	450
Dry Cleaning Fluid	Caled Chemical	HYDROCLENE	450
Dry Cleaning Fluid	Shell Chemicals	SHELLSOL D40	450
Dry Cleaning Fluid	Shell Chemicals	SHELLSOL D60	450
Dry Cleaning Fluid	Caled Industries	Gen-X	450
Detergent	R. R. Street & Co.	Everest	450
Detergent	R. R. Street & Co.	Pinnacle	450
Detergent	Microclean America Corp.	BIGEN	438

When not using detergent, the volume of all dry cleaning fluids used for each petroleum dry cleaning machine shall not exceed the usage limitation found below in any consecutive twelve (12) month period.

Manufacturer	Product Name	Dry cleaning fluid Usage (gallons)
ExxonMobil	DF-2000	540
Chevron Phillips Chemical	ECOSOLV	540
Caled Chemical	HYDROCLENE	540
Shell Chemicals	SHELLSOL D40	540
Shell Chemicals	SHELLSOL D60	540
Caled Industries	Gen-X	520
