# AGENDA

1) Metrics for the actions on the CERP – we need to develop metrics that can help us track results from all of the CERP Actions. We will include this discussion as part of our next Steering Committee meeting but it would be useful to have an initial focused discussion with the CERP Subcommittee
2) Health Risks modeling from CARB – we need to provide input to CARB on what we want to get out of the modeling exercise to help inform the project. This item is also included on our agenda for this month's Steering Committee meeting. We need to start working on objectives and expectations for this exercise. CARB will be developing a paper/report addressing those objectives and documenting the modeling.
