

School Composite Wood Products Replacement

Part 1—School Facility

School Name: _____

School Address: _____

School Building: _____

City and ZIP Code: _____

Grade levels of students at this school: _____

School District: _____

Part 2—Select Proposed Replacement Products

Composite wood product type	Funding for no-added formaldehyde resin (NAF)	Funding for ultra-low emitting formaldehyde (ULEF)
<input type="checkbox"/> Tables/Desks/Countertops	100% of cost above non-NAF product cost	90% of cost above non-ULEF product cost
<input type="checkbox"/> Chairs	100% of cost above non-NAF product cost	90% of cost above non-ULEF product cost
<input type="checkbox"/> Cabinets	100% of cost above non-NAF product cost	90% of cost above non-ULEF product cost

Part 3—Composite Wood Products

Please describe the composite wood product(s) currently in use at the facility as well as the proposed composite wood product(s):

Composite wood product type	Describe the room in which the furniture is used (location, use, typical number of adults and children in room throughout school day)	In use composite wood product manufacturer	Proposed composite wood product manufacturer	Number of pieces of furniture of this type to be replaced	Cost of similar composite wood product that is not NAF/ULEF certified	Is proposed composite wood product NAF or ULEF certified?	Cost of proposed composite wood product
						<input type="checkbox"/> NAF <input type="checkbox"/> ULEF	
						<input type="checkbox"/> NAF <input type="checkbox"/> ULEF	
						<input type="checkbox"/> NAF <input type="checkbox"/> ULEF	
						<input type="checkbox"/> NAF <input type="checkbox"/> ULEF	

Composite wood product type	Describe the room in which the furniture is used (location, use, typical number of adults and children in room throughout school day)	In use composite wood product manufacturer	Proposed composite wood product manufacturer	Number of pieces of furniture of this type to be replaced	Cost of similar composite wood product that is not NAF/ULEF certified	Is proposed composite wood product NAF or ULEF certified? 						<input type="checkbox"/> NAF <input type="checkbox"/> ULEF	
						<input type="checkbox"/> NAF <input type="checkbox"/> ULEF	
						<input type="checkbox"/> NAF <input type="checkbox"/> ULEF	

Part 4—Certification

- I understand that the composite wood products must be used at a school that:
 - Is located in a disadvantaged community, as described by [CARB's Priority Population Map](#);
 - Is under the exclusive control of the officers of the public schools; and
 - Serves students in any grades from kindergarten through twelfth grade.
- I understand that the replacement composite wood products must be solicited and selected through a competitive bidding process, and the APCD must approve the selection. If glues are required to affix a wood veneer or synthetic material to the composite wood platform, the bids must specify NAF/ULEF glues, as certified by a CARB-approved third-party certifier. For each composite wood product type, I am including with this application two bids specifying NAF/ULEF glues and two bids that do not specify NAF/ULEF glues. The bids specify the composite wood material (hardwood plywood (HWPW), medium-density fiberboard (MDF), particleboard (PB), thin MDF) and the dimensions of the NAF/ULEF boards in the products.
- With this application, I am including photo documentation of the existing composite wood products including all manufacturer information, if on wood product.
- I understand that the replacement wood products must:
 - have a similar use as old equipment,
 - be a composite wood product, and
 - be certified by a CARB approved third-party certifier to ensure all materials used are NAF/ULEF.

I declare, under penalty of perjury under the laws of the State of California, that the information provided above is true and correct.
