

San Diego County Air Pollution Control District

July 12, 2022

Dear Community Member:

State law (Air Toxics "Hot Spots" Information and Assessment Act of 1987) protects your right to know about possible health risks from toxic air contaminants emitted by sources of air pollution in your neighborhood. The San Diego County Air Pollution Control District (APCD) is the local government agency responsible for implementing the Air Toxics "Hot Spots" Program in San Diego County.

The following facility is required to notify all community members living in areas where there is a potential health risk at or above the significant risk threshold in accordance with APCD Rule 1210 and hold a public meeting to discuss this information. The enclosed map shows the boundaries of the area where the health risks are at or above the significant risk threshold.

Facility Name: Robertson's Ready Mix
Address: 2266 Willow Glen Drive, El Cajon, CA 92019
Type of Business: Mineral Industry

Based on air emission data in 2017 the APCD requested a health risk assessment from Robertson's Ready Mix. The health risk assessment, approved by the APCD on April 27, 2022, shows that the level of exposure to some toxic air contaminants, primarily Nickel, resulting from the operation of drilling and blasting, from Robertson's Ready Mix, may result in greater potential for adverse health impacts for people who live in the area shown. Specifically, the health risk assessment shows the Maximum Residential Acute Non-Cancer Health Hazard Index is 1.74. The noncancer health hazard index is calculated by dividing the estimated level of exposure to chemicals emitted from a facility to the level of exposure that is not expected to cause any adverse health effects. If the hazard index is less than one (1.0), then the estimated level of exposure is not likely to result in adverse health effects. A hazard index at or above one (1.0) indicates that there may be greater potential for adverse health effects from exposure to the toxic air contaminants of concern. A hazard index is calculated for both acute (short-term) and chronic (long-term) exposures to air toxic contaminants in facility emissions.

APCD Rule 1210 defines significant health risk thresholds as, and requires public notification and a public meeting, when the cancer risk is at or above 10 in one million, or when any of the non-cancer health hazard indexes or cancer burden is at or above 1.0. As indicated above, for this facility, the maximum residential acute health hazard index is 1.74, which is above one (1.0). APCD Rule 1210 also requires facilities with emissions at or above significant health risk thresholds (for cancer risk the 10 in one million health risk threshold applies to emissions that occurred in calendar year 2018 or later) to submit an application for a risk reduction audit and

plan with a proposal to reduce their health risks below these health risk thresholds. This facility is required to submit an application for a risk reduction audit and plan to APCD by October 24, 2022. If you wish to receive a notice of the plan, please sign up for the APCD GovDelivery subscription service using the following link: <https://bit.ly/3JTGsre>. Please select the *Air Pollution Control District News* list.

The APCD has prepared the enclosed “Program Fact Sheet” regarding its Air Toxic Hot Spots Program and a survey card to obtain your questions and comments regarding the information provided in this notice. If you would like more information, please complete and return the enclosed survey card to the APCD via mail, 10124 Old Grove Road, San Diego, 92131, or e-mail at APCDEngineering@sdapcd.org.

Additionally, a virtual public meeting has been scheduled for Thursday, August 11, 2022, at 5:00 P.M. to discuss the information on this notification and address your questions. If interested, please join the meeting at <https://bit.ly/robertsons-HRA>. For more information regarding the APCD’s Air Toxics Hot Spots program, please contact the APCD at 858-586-2600 or via email at APCDEngineering@sdapcd.org. For more information regarding the facility please contact Mike Orozco with Robertson’s Ready Mix via email at mikeo@rmca.com or at 951-493-6500 ext. 6597.

Sincerely,

PAULA FORBIS

Air Pollution Control Officer
