

San Diego County Air Pollution Control District

May 6, 2022

Dear Employee:

State law (Air Toxics "Hot Spots" Information and Assessment Act of 1987) protects your right to know about possible health risks from toxic air contaminants emitted by sources of air pollution in your neighborhood. The San Diego County Air Pollution Control District (APCD) is the local government agency responsible for implementing the Air Toxics "Hot Spots" Program in San Diego County.

The following facility is required to notify all workers working in areas where there is a potential health risk at or above the significant risk threshold in accordance with APCD Rule 1210. The enclosed map shows the boundaries of the area that is exposed to health risks at or above the significant risk threshold.

Facility Name: Vulcan Materials Western Division
Address: 10051 Black Mountain Road, San Diego, CA, 92126
Type of Business: Mineral Industry

Based on air emission data in 2017 the APCD requested a health risk assessment from Vulcan Materials. The health risk assessment, approved by the APCD in February of 2022, shows that the level of exposure to some toxic air contaminants, primarily Arsenic and Silica, may result in greater potential for adverse health impacts. Specifically, the Health Risk Assessment shows the *Maximum Worker Chronic Non-Cancer Health Hazard Index* is 1.20. The HRA also shows that the level of exposure to some toxic air contaminants, primarily Nickel, may result in greater potential for adverse health impacts. Specifically, the Health Risk Assessment shows the *Maximum Acute Non-Cancer Health Hazard Index* is 2.63.

The noncancer health hazard index is calculated by dividing the estimated level of exposure to chemicals emitted from a facility to the level of exposure that is not expected to cause any adverse health effects. If the hazard index is less than or equal to one (1.0), then the estimated level of exposure is not likely to result in adverse health effects for anyone, including sensitive individuals such as children and the elderly. A hazard index above one (1.0) indicates that there may be greater potential for adverse health impacts from exposure to the toxic air contaminants of concern. A hazard index is calculated for both acute (short-term) and chronic (long-term) exposures to air toxic contaminants in facility emissions.

APCD Rule 1210 defines significant health risk thresholds as, and requires public notification and a public meeting when the cancer risk is above 10 in one million, or when any of the non-cancer health hazard indexes or cancer burden is greater than 1.0. As indicated above, for this facility, the maximum worker chronic non-cancer health hazard index is 1.20 and the maximum

acute non-cancer health hazard index is 2.63, both of which are above 1.0. APCD Rule 1210 also requires facilities with emissions at or above significant health risk thresholds (for cancer risk of 10 in one million the threshold applies to emissions that occurred in calendar year 2018 or later) to submit a risk reduction audit and plan with a proposal on how to reduce their health risks below these thresholds. This facility is required to submit a risk reduction audit and plan to APCD by August 21, 2022. If you wish to receive a notice of the plan, please sign up for the APCD GovDelivery subscription service using the following link: <https://bit.ly/3JTGsre>. Please select the *Air Pollution Control District News* list.

The APCD has prepared the enclosed “Program Fact Sheet” regarding its Air Toxic Hot Spots Program and a survey card to obtain your questions and comments regarding the information provided in this notice. If you would like more information, please complete and return the enclosed survey card to the APCD via mail, 10124 Old Grove Road, San Diego, 92131, or e-mail at APCDEngineering@sdapcd.org.

Additionally, a virtual public meeting has been scheduled as follows to discuss the information on this notification and address your questions.

DATE:	Wednesday, June 8, 2022
TIME:	5:00 p.m. to 6:30 p.m.
HOW TO PARTICIPATE:	Via web browser or mobile device at:
https://bit.ly/38Vewq7	Zoom Meeting ID: 978 5647 4974 Passcode 891411

For more information regarding the APCD’s Air Toxics Hot Spots program, please contact the APCD at 858-586-2600 or via email at APCDEngineering@sdapcd.org. For more information regarding the facility please contact **Ms. Barbara Goodrich-Welk**, Manager Government and Community Relations, Vulcan Materials Company, at 858-530-9444 or goodrich-welkb@vmcmail.com.

Sincerely,

PAULA FORBIS
Air Pollution Control Officer
