

San Diego County Air Pollution Control District

June 28, 2022

Dear Employee:

State law (Air Toxics "Hot Spots" Information and Assessment Act of 1987) protects your right to know about possible health risks from toxic air contaminants emitted by sources of air pollution in your neighborhood. The San Diego County Air Pollution Control District (APCD) is the local government agency responsible for implementing the Air Toxics "Hot Spots" Program in San Diego County.

The following facility is required to notify all employees working in areas where there is a potential health risk at or above the significant risk threshold in accordance with APCD Rule 1210 and hold a public meeting to discuss this information. The enclosed map shows the boundaries of the area that is exposed to health risks at or above the significant risk threshold.

Facility Name: Vulcan Materials Company
Address: 7522 Paseo de la Fuente, San Diego, CA 92154
Type of Business: Asphalt Plant

Based on air emission data in 2019 the APCD requested a health risk assessment from Vulcan Materials Company. The health risk assessment, approved by the APCD on April 5, 2022, shows that the level of exposure to some toxic air contaminants, primarily nickel resulting from operation of the asphalt plant exhaust stack, may result in greater potential for adverse health impacts. Specifically, the Health Risk Assessment shows the *Maximum Worker Acute Health Hazard Index* is 1.18. The noncancer health hazard index is calculated by dividing the estimated level of exposure to chemicals emitted from a facility to the level of exposure that is not expected to cause any adverse health effects. If the hazard index is less than one (1.0), then the estimated level of exposure is not likely to result in adverse health effects for anyone, including sensitive individuals such as children and the elderly. A hazard index at or above one (1.0) indicates that there may be greater potential for adverse health impacts from exposure to the toxic air contaminants of concern. A hazard index is calculated for both acute (short-term) and chronic (long-term) exposures to air toxic contaminants in facility emissions.

APCD Rule 1210 defines significant health risk thresholds as, and requires public notification and a public meeting, when the cancer risk is at or above 10 in one million, or when any of the non-cancer health hazard indexes or cancer burden is at or above 1.0. As indicated above, for this facility, the maximum worker acute health hazard index is 1.18, which is above 1.0. APCD Rule 1210 also requires facilities with emissions at or above significant health risk thresholds (for cancer the threshold applies to emissions that occurred in calendar year 2018 or later) to submit an application for a risk reduction audit and plan with a proposal on how to reduce their health risks

below these thresholds. This facility is required to submit an application for a risk reduction audit and plan to APCD by October 3, 2022. If you wish to receive a notice of the plan, please sign up for the APCD GovDelivery subscription service using the following link: <https://bit.ly/3JTGsre>. Please select the *Air Pollution Control District News* list.

The APCD has prepared the enclosed “Program Fact Sheet” regarding its Air Toxic Hot Spots Program and a survey card to obtain your questions and comments regarding the information provided in this notice. If you would like more information, please complete and return the enclosed survey card to the APCD via mail, 10124 Old Grove Road, San Diego, 92131, or e-mail at APCDEngineering@sdapcd.org.

Additionally, a virtual public meeting has been scheduled for Wednesday, July 13th at 5 P.M. to discuss the information on this notification and address your questions. Register online prior to the meeting at: <https://vulcanmaterials.zoom.us/j/92204184583>

For more information regarding the APCD’s Air Toxics Hot Spots program, please contact the APCD at 858-586-2600 or via email at APCDEngineering@sdapcd.org. For more information regarding the facility please contact Barbara Goodrich-Welk at Goodrich-welkb@vmcmail.com with Vulcan Materials Company.

Sincerely,

PAULA FORBIS
Air Pollution Control Officer
