Notice of Revised Health Risk Reduction Plan Submitted by Minnesota Methane

The San Diego County Air Pollution Control District (SDAPCD) has received a revised health risk reduction plan under application APCD2026-RRP-990013 from Minnesota Methane San Diego (Minnesota Methane), a Landfill Gas to Energy facility located at 5244 Convoy St, San Diego. In accordance with SDAPCD Rule 1210, Minnesota Methane was required to submit a health risk reduction plan to propose how it intended to reduce the health risk associated with the facility's 2018 air toxic emissions. The District approved the plan on October 30, 2024, which contained a requirement for Minnesota Methane to design and implement additional emission reductions. This application is intended to fulfill this requirement, and proposes installation of exhaust stack extensions and adjustments to risk analysis that comprehensively address the requirements of Risk Reduction in Rule 1210.

The facility's revised Health Risk Reduction Plan is available for public review and comments under the following link:

<https://www.sdapcd.org/content/sdapcd/permits/public-notices.html>.

Written comments may be submitted for a period of 30 days, ending on October 30, 2026, via email at APCDEngineering@sdapcd.org or by mail to 10124 Old Grove Road, San Diego, California, 92131. Please direct your comments to the attention of the Engineering Division.

Should you have any questions regarding this notice, please contact the Engineering Division at APCDEngineering@sdapcd.org or at (858) 586-2600 and reference the listed application number.
