

San Diego APCD
Emissions Inventory Request Form Instructions

**EMISSION FACTOR PROCEDURE BASED ON PRODUCTION
(TONS)**

Please refer to the general instructions for guidance regarding the following sections: Reporting Year, Facility Identification, Permit Information, Device Information, Stack / Ducted Emissions and Fugitive Release Emissions.

MATERIAL/ PROCESS INFORMATION

This form is used for unspecified processes whose emissions can be calculated from emission factors based on tons of productions. Fill in all the data fields. Complete all blanks using the specified units. Use a separate form to report each material used for each device. Copy the blank form as needed to report each material used. On forms with pre-printed process information from a previously submitted inventory, asterisks (*) highlight data fields that must be updated.

Product Name: Provide the product name.

Annual Production (ton/year): Total tons of each product produced during the reporting year.

Hourly Production (ton/hour): Maximum tons of each product produced in one hour.

POLLUTANT NAME (lbs/Ton Production)

If available, provide site-specific emissions in units of pounds released per ton of product for all pollutants. The reported emission factors should account for device specific capture and control efficiencies.
