

San Diego APCD
Emissions Inventory Request Form Instructions

FIBERGLASS AND REINFORCED PLASTIC OPERATIONS

Please refer to the general instructions for guidance regarding the following sections: Reporting Year, Facility Identification, Permit Information, Device Information, Stack / Ducted Emissions and Fugitive Release Emissions.

MATERIAL/ PROCESS INFORMATION

Fill in all the data fields. Complete all blanks using the specified units and answer yes or no where requested. Use a separate form to report each material used for each device. Copy the blank form as needed to report each material used. On forms with pre-printed process information from a previously submitted inventory, asterisks (*) highlight data fields that must be updated.

Material Name: Identify the type of material reported on each form (for example, gel coat, polyester resin, clean-up solvent).

Density and VOC Content: Provide the density and VOC content from the MSDS for each material used. Please include an up-to-date copy of the MSDS for each material whose usage exceeds 100 gallons.

Process Information: Indicate the type of process reported on each form by answering yes or no (Y/N) for each type of process.

POLLUTANT NAME (weight percent)

If available, provide the weight percent of each pollutant in each material used (i.e., acetone, methylene chloride, styrene, toluene, 1,1,1-trichloroethane, etc.). The District will complete this section if you provide the MSDS information for the reported material.
