Emissions Inventory Request Form Instructions

GASOLINE – BULK TERMINAL VAPOR PROCESSORS

Please refer to the general instructions for guidance regarding the following sections: Reporting Year, Facility Identification, Permit Information, Device Information, Stack / Ducted Emissions and Fugitive Release Emissions.

MATERIAL/ PROCESS INFORMATION

Fill in all the data fields. Complete all blanks using the specified units and answer yes or no where requested. Use a separate form to report each material used for each device. Copy the blank form as needed to report each material used. On forms with pre-printed process information from a previously submitted inventory, asterisks (*) highlight data fields that must be updated.

Primary Control Devices: Identify the type of control equipment used for primary control (i.e., condenser, thermal oxidizer, etc.).

Secondary Control Devices: Identify the type of control equipment used for secondary control.

Gasoline Thru-put (barrels/yr): Report the total volume of gasoline dispensed by all loading racks associated with this vapor processing unit.

Other Fuels Thru-put: Report the total volume of diesel, jet fuel, and transmix handled by the facility.

Device Operating Schedule:

Daily Operation (hours/day): Report the average amount of hours the device operates in a typical day.

Weekly Operation (days/week): Report the average number of days the device operates in a typical week.

Annual Operation (days/year): Report the number of days the device operated during the Reporting Year.

POLLUTANT NAME (lbs/1000 gal thru-put)

If available, provide controlled emission factors for each pollutant emitted from the vapor processor (pounds per 1000 gallons of gasoline throughput) with supporting documentation. The District will use default emission factors where site-specific information is not available or not documented.
