Emissions Inventory Request Form Instructions

GASOLINE – GENERAL STORAGE AND DISPENSING

Please refer to the general instructions for guidance regarding the following sections: Reporting Year, Facility Identification, Permit Information, Device Information, Stack / Ducted Emissions and Fugitive Release Emissions.

MATERIAL/ PROCESS INFORMATION

Fill in all the data fields. Complete all blanks using the specified units and answer yes or no where requested. Use a separate form to report each storage tank used. Copy the blank form as needed to report each storage tank. On forms with pre-printed process information from a previously submitted inventory, asterisks (*) highlight data fields that must be updated.

Annual Gasoline Throughput (gal/year): Report the amount of gasoline through-put for each storage tank in gallons per year.

Max. Gasoline Delivery (gallons): Report the maximum amount of gasoline delivered to a storage tank in gallons.

EVR = Enhanced Vapor Recovery.

Device Operating Schedule:

Daily Operation (hours/day): Report the average amount of hours the device operates in a typical day.

Weekly Operation (days/week): Report the average number of days the device operates in a typical week.

Annual Operation (days/year): Report the number of days the device operated during the Reporting Year.

POLLUTANT NAME (lbs pollutant/1000 gallons fuel)

If available, please provide emission factors (pounds pollutant per 1000 gallons fuel throughput) and supporting documentation. The District will use default composition if none is provided and documented.
