

San Diego APCD
Emissions Inventory Request Form Instructions

MINERAL PRODUCTS – CEMENT TREATED BASE (CTB) PLANTS

Please refer to the general instructions for guidance regarding the following sections: Reporting Year, Facility Identification, Permit Information, Device Information, Stack / Ducted Emissions and Fugitive Release Emissions.

MATERIAL/ PROCESS INFORMATION

Fill in all the data fields. Complete all blanks using the specified units. Use a separate form to report each Plant Type. Copy the blank form as needed to report each Plant Type. On forms with pre-printed process information from a previously submitted inventory, asterisks (*) highlight data fields that must be updated.

Plant Type: Plant type is CTB or Dry Mix.

Annual Production (tons/year): Report the tons of material produced during the reporting year.

Maximum Hourly Production (tons/hr): Report the maximum hourly production rate in tons.

Weigh Hopper Controls (describe): Identify any weigh hopper control equipment.

Truck Loading Controls (describe): Identify any truck loading control equipment.

Device Operating Schedule:

Daily Operation (hours/day): Report the average amount of hours the device operates in a typical day.

Weekly Operation (days/week): Report the average number of days the device operates in a typical week.

Annual Operation (days/year): Report the number of days the device operated during the Reporting Year.

POLLUTANT NAME (lbs/lbs TSP)

If available, provide site-specific emission factors in units of pounds of pollutant released per pound of TSP released with supporting documentation. Default emission factors will be used to calculate emissions where site-specific information is not available or not documented.
