

San Diego County
**Air Pollution
Control District**

May 17, 2024

**ATTENTION: PARENTS OR GUARDIANS OF CHILDREN ATTENDING SOUTHWEST MIDDLE SCHOOL,
NEIGHBORING RESIDENTS & BUSINESSES
NOTICE OF INTENT TO ISSUE A PERMIT FOR CONSTRUCTION**

This notice is to inform you that an application has been filed with the San Diego County Air Pollution Control District (SDAPCD) by Lockheed Martin RMS for a Permit to Construct and Operate an Adhesive Material (adhesives is a substance used for sticking objects or materials together, a type of glue) Application operation inside of a spray booth at 1330 30th St. Ste E, San Diego, CA 92154.

You are receiving this notice because state law requires local air pollution control districts, such as SDAPCD, to notify certain individuals prior to approving construction of any equipment that may increase release into the air of any amounts of toxic air contaminant emissions within 1,000 feet of a school. The notice is sent to all addresses within 1,000 feet of the equipment and is intended for residences and businesses within the area shown in the attached map and for parents or guardians of children attending any schools located within a quarter mile radius of the equipment. The law also requires the SDAPCD to consider any public comments before approving the permit for construction of this equipment.

Toxic air contaminants are chemicals in the form of gases, liquids, or particles that are emitted into the atmosphere and, when individuals are exposed to them, may cause adverse health effects. The spray booth is a piece of air pollution control equipment for control of fine particles and will be used to apply adhesives that contain air contaminants such as volatile organic compounds (VOCs) and toxic air contaminants (TACs).

The SDAPCD is committed to improving air quality to protect public health and the environment by applying and enforcing local, state and federal air quality rules and regulations in San Diego County. The proposed project has been evaluated by the SDAPCD and is expected to operate in compliance with all applicable air quality rules and regulations. The permit will include limitations on daily VOC emission rate and other requirements to ensure that emissions of these compounds do not exceed any applicable rule thresholds.

Written comments concerning the air quality issues associated with the SDAPCD's proposed action may be submitted to SDAPCD by June 30, 2024. Please refer to Application No. APCD2023-APP-008026 on all correspondence regarding this project. The SDAPCD's evaluation of this application and proposed permit conditions are available on the SDAPCD's website at: <https://www.sdapcd.org/content/sdapcd/permits/public-notices.html>.

Please note that the SDAPCD does not have the authority to make zoning or land use decisions or decide where equipment can be located but does evaluate all permits for compliance with applicable federal, state,

and local air quality rules, regulations and requirements. Any questions concerning zoning, land use designations, or local ordinances should be directed to the local city or county Development Services Department.

Comments and questions regarding this notice may be directed to the SDAPCD's Engineering Division at (858) 586-2600 or APCDEngineering@sdapcd.org.

Sincerely,

Allison Weller

Senior Air Pollution Control Engineer
