

FOR YOUR INFORMATION

The Following Notice was Published by the District

**NOTICE OF PRELIMINARY DECISION
TO APPROVE AN EMISSION REDUCTION CREDIT BY
THE SAN DIEGO AIR POLLUTION CONTROL
DISTRICT**

The San Diego Air Pollution Control District hereby gives notice that in accordance with Rule 26.0 of the District's Rules and Regulations, the Air Pollution Control Officer has made preliminary decision to approve an application for emission reduction credits submitted by Applied Energy Corporation. This application was for the shutdown of a natural gas combustion turbine and two steam boilers, located at 3970 Surface Navy Blvd, USN Naval Station at 32nd St., San Diego, CA 92136, used for electricity and steam production. This shutdown has been evaluated to create 49.62 tons/year of actual emissions reductions for oxides of nitrogen (NO_x), 2.87 tons/year of actual emissions reductions for volatile organic compounds (VOC) and 8.07 tons/year of actual emissions reductions for particulate matter (PM).

The District has determined that these reductions are real, surplus, enforceable, quantifiable and permanent when all conditions imposed by the District are complied with, and therefore the credits will be classified as "class A emission reduction credits". These credits are transferrable in whole or in part, and are eligible for use as emission offsets pursuant to all District rules and regulations.

The evaluation of this application is available for review by contacting the Air Pollution Control District, 10124 Old Grove Road, San Diego, CA 92131. Please refer to Application No. 2019-ERC-000107 on all correspondence regarding this project. Written comments concerning the District's proposed action may be submitted for a period of 30 days commencing October 14, 2020 and ending on November 14, 2020. Questions regarding this notice may be directed to Camqui Nguyen at (858) 586-2747 or via email to Camqui.Nguyen@sdcounty.ca.gov.
