NOTICE OF WORKSHOP

FOR DISCUSSION OF PROPOSED AMENDMENT OF
RULE 67.11 – WOOD PRODUCTS COATING OPERATIONS
AND THE PROPOSED ADOPTION OF
NEW RULE 67.11.1 – LARGE COATING OPERATIONS FOR WOOD PRODUCTS

The San Diego County Air Pollution Control District (District) will hold a public meeting to consider the amendment of Rule 67.11 – Wood Products Coating Operations and the adoption of proposed new Rule 67.11.1 – Large Coating Operations for Wood Products. Comments may be submitted in writing before, or made at, the workshop which is scheduled as follows:

DATE: Friday, June 7, 2002
TIME: 9:00 a.m.
PLACE: Conference Room 139
San Diego Air Pollution Control District
9150 Chesapeake Drive
San Diego, CA

Both Rule 67.11 and proposed new Rule 67.11.1 control emissions of volatile organic compounds (VOC) from wood coating operations. VOC react in the atmosphere to form ozone. San Diego County is classified as a serious ozone non-attainment area pursuant to the California Clean Air Act and the Federal Clean Air Act. Accordingly, the District is required by the California Clean Air Act to adopt rules that reflect Best Available Retrofit Control Technology (BARCT) and implement all feasible measures to reduce emissions of ozone precursors. The District must also adopt rules that reflect Reasonably Available Control Technology (RACT) as mandated by the Federal Clean Air Act.

The District is proposing new Rule 67.11.1 to implement Federal RACT for large wood-coating operations. Rule 67.11.1 will only affect large wood-coating facilities that emit 25 tons or more of VOC per calendar year from wood coating operations. New Rule 67.11.1 is identical to existing Rule 67.11 except that it will:

• Specify lower VOC limits for certain wood coating categories for large wood-coating facilities.

OVER
• Require a continuous monitoring system for those facilities opting to use VOC emission control equipment to comply with the standards for large wood-coating facilities.

• Update the Test Methods section.

The proposed amendments to Rule 67.11, which reflects state-mandated BARCT, will also only affect large wood-coating facilities, those that emit greater than 25 tons or more VOC per calendar year. Specifically, proposed amended Rule 67.11 will:

• Add a new subsection for large wood-coating facilities with lower VOC limits for several coating categories. These limits will be identical to those in proposed new Rule 67.11.1.

• Update the Test Method Section.

The proposed amendments to Rule 67.11 and addition of new Rule 67.11.1 are not expected to have a significant impact on any existing facilities. Currently, there is only one large wood-coating facility in San Diego County and this facility can comply with proposed new Rule 67.11.1 and amended Rule 67.11.

Because new Rule 67.11.1 will contain only federal requirements, it will be submitted to the Environmental Protection Agency for inclusion into the State Implementation Plan (SIP). Because Rule 67.11 contains state-mandated requirements that are more stringent than federal requirements, Rule 67.11 is not currently included in the SIP and the District does not intend to submit amended Rule 67.11 for inclusion in the SIP. Therefore, the Environmental Protection Agency will have no enforcement authority over Rule 67.11.

If you would like a copy of proposed amended Rule 67.11 or proposed new Rule 67.11.1, please access the District's Website at www.sdapcd.co.san-diego.ca.us under "Advisories and Notices," Workshop Notices or call Luann Serbesk at (858) 650-4544. If you have any questions concerning the rules, please call Angela Durr at (858) 650-4541 or Steve Moore at (858) 650-4598.

Richard J. Smith, Acting Director
Air Pollution Control District

05/8/02
RULE 67.11 WOOD PRODUCTS COATING OPERATIONS
(Adopted & Effective 3/14/89; Rev. Effective 8/13/97; Rev. Effective date of adoption)

(a) APPLICABILITY

(1) Except as otherwise provided in Section (b), this rule is applicable to all wood products coating operations.

(2) Any coating operation subject to the requirements of Rules 67.0 or 67.18 shall not be subject to this rule.

(3) Rule 66 shall not apply to any coating operation which is subject to Sections (d) or (e) of this rule.

(b) EXEMPTIONS

(1) The provisions of Sections (d), (e) and (f) shall not apply to the following:

   (i) A stationary source which applies less than 500 gallons of coatings to wood products in every consecutive twelve-month period. It shall be the responsibility of any person claiming this exemption to maintain monthly purchase and monthly or daily usage records. These records shall be maintained on-site for three years and made available to the District upon request.

   (ii) Coatings applied using non-refillable handheld aerosol spray containers.

(2) The provisions of Subsection (d)(1) shall not apply to the following:

   (i) Any coatings when applied by the use of air brushes with a coating capacity of two ounces (59.1 ml) or less.

   (ii) Any coatings when applied during touch-up operations.

(3) The provisions of Subsections (d)(2), (d)(3) and (d)(4) shall not apply to coatings applied to wooden musical instruments.

(c) DEFINITIONS

For the purposes of this rule the following definitions shall apply:

(1) "Adhesive" means a material applied to a wood surface for the sole purpose of bonding the wood surface with another wood or non-wood surface by attachment.
(2) "Binder" means a non-volatile polymeric organic material, such as a resin, which forms a surface film during coating applications.

(3) "Clear Sealer" means a coating which contains binders, but not opaque pigments, and is specifically formulated to seal wood surfaces prior to the application of subsequent coatings.

(34) "Clear Topcoat" means a final coating which contains binders, but not opaque pigments, and is specifically formulated to form a transparent or translucent solid protective film. Clear topcoats include clear lacquers and varnishes but exclude conversion varnishes.

(45) "Coating" means a material containing more than 20 grams per liter of VOC as applied, less water and exempt compounds, which can be applied as a thin layer to a substrate, and which dries or cures to form a continuous solid film, including but not limited to any paint, sealer, varnish, or lacquer, and excluding any adhesives. Coating also includes stains, inks, fillers, wash coats, and toners.

(56) "Coating Operation" means all steps involved in the application, drying and/or curing of surface coatings, including touch-up operations, and associated stripping, surface preparation and coating application equipment cleaning.

(67) "Conversion Varnish" means a topcoat which is comprised of a homogeneous liquid (alkyd-amino resin), which when acid catalyzed and applied, hardens by evaporation and polymerization.

(78) "Dip Coat" means a coating application method accomplished by dipping an object into the coating material.

(89) "Electrostatic Spray" means a coating application method accomplished by charging atomized paint particles for deposition by electrostatic attraction.

(910) "Exempt Compound" means the same as defined in Rule 2.

(4011) "Filler" means a material used to fill in cracks, grains and imperfections of wood before applying a coating.

(4412) "Flow Coat" means a coating application method accomplished by flowing a stream of coating over an object.

(4213) "Glaze Stain" means a semi-transparent tinted coating applied on a previously coated surface to produce a decorative effect.
"Hand Application Method" means a coating application method accomplished by applying a coating by manually held, non-mechanically operated equipment. Such equipment includes paintbrushes, hand rollers, rags and sponges.

"High-Solids Stain" means a stain containing more than one pound of solids per gallon of material.

"High-Volume Low-Pressure (HVLP) Spray" means a coating application method which uses pressurized air at a permanent pressure between 0.1 and 10.0 psig, not to exceed 10.0 psig, measured at the air cap of the coating application system.

"Ink" means a liquid that contains dyes and/or colorants and is used to make markings, but not to protect surfaces.

"Low-Solids Coating" means a coating containing one pound of solids or less per gallon of material, or less.

"Low-Solids Stain" means a stain containing one pound of solids or less per gallon, or less.

"Medium Density Fiberboard (MDF) Coating" means the initial coating which is applied directly to the surface of MDF, which is a wood product composed of tightly compressed wood fibers bonded with resins, and has a density greater than 45 pounds per cubic foot.

"Multi-Colored Coating" means a coating which exhibits more than one color when applied and which is packaged in a single container and applied in a single coat.

"New Wood Product" means a wood product which has not been previously coated. A wood product from which coatings have been removed to repair flaws in initial coating applications is a new wood product.

"Pigmented Coating" means an opaque coating containing binders and colored pigments, and formulated to hide the wood surfaces.

"Pigmented Primer, Sealers, and Undercoats" means opaque coatings which contain binders and colored pigments formulated to hide the wood surface, that are applied prior to the topcoat to provide a firm bond, level the wood product surface, or seal the wood product surface.
(25) "Pigmented Topcoat" means a final opaque coating which contains binders and colored pigments, and is specifically formulated to hide the wood surface and form a solid protective film.

(26) "Refinished Wood Product" means a post-consumer wood product which has had some or all of the coatings removed, and to which new coatings are applied in order to preserve or restore the post-consumer wood product to its original condition. A wood product from which coatings have been removed to repair flaws in initial coatings applications is not a refinished wood product.

(27) "Roll Coat" means a coating application method accomplished by rolling a coating onto a flat surface using a roll applicator.

(28) "Sealer" means a coating which contains binders and which seals wood surfaces prior to the application of subsequent coatings.

(29) "Stationary Source" means the same as defined in Rule 2.

(30) "Stripper" means a liquid applied to remove a coating or coating residue.

(31) "Toner" means a coating which contains not more than one pound of binders and dyes or pigments per gallon of coating and which is used to add tint to a coated surface.

(32) "Touch-up Operation" means the portion of a coating operation which is incidental to the main coating process but necessary to cover minor imperfections or minor mechanical damage incurred prior to intended use, or to achieve coverage as required.

(33) "Transfer Efficiency" means the ratio of the weight of coating solids adhering to the part being coated to the weight of coating solids used in the application process expressed as a percentage.

(34) “Uncontrolled VOC Emissions” means VOC emissions from a wood products coating operation, before application of add-on air pollution control equipment or process modification.

(35) "Volatile Organic Compound" (VOC) means the same as defined in Rule 2.

(36) "VOC Content Per Pound of Coating Solids" means the weight of VOC per weight of coating solids and can be calculated by the following equation:

\[ C_s = \frac{W_s - W_w - W_{es}}{W_s} \]
where:

\[ C_s = \text{VOC content per pound of coating solids} \]
\[ W_v = \text{Weight of volatile compounds, in pounds} \]
\[ W_w = \text{Weight of water, in pounds} \]
\[ W_{es} = \text{Weight of exempt compounds, in pounds} \]
\[ W_c = \text{Weight of coating solids, in pounds} \]

(3237) "VOC Content Per Volume of Coatings, Less Water and Exempt Compounds" means the same as defined in Rule 2.

(3338) "VOC Content Per Volume of Material" means the same as defined in Rule 2.

(3439) "Wash Coat" means a coating containing not more than one pound of solids per gallon, which is used to seal wood surfaces, prevent undesired staining and control penetration. A wash coat may also be used to provide a barrier coat when paper laminates are applied to the wood surface, or when glazes are applied during the coating operation.

(3540) "Wood Products" means any objects that are made of or primarily fabricated with solid wood, wood composition, bamboo and/or rattan, including furnishings, art objects, tables, chairs, beds, sofas, and shutters and cabinets which are not permanently attached to stationary structures at the time of coating.

(d) STANDARDS (Rev. Effective 8/13/97)

(1) Application Equipment

Except as provided in Subsection (b)(2), no coatings shall be applied unless one of the following application methods is used:

(i) Hand application method, or

(ii) Dip coat, or

(iii) Roll coat, or

(iv) Flow coat, or

(v) Electrostatic spray, or

(vi) High-volume low-pressure (HVLP) spray, or

(vii) Other coating application methods that are demonstrated to have a transfer efficiency at least equal to one of the above application methods, and which are used in such a manner that the parameters under which they were tested are
permanent features of the method. Such coating application methods shall be approved in writing by the Air Pollution Control Officer prior to use.

(2) VOC Limits for New Wood Products

(i) Except as provided in Subsection (d)(2)(ii), on and after August 13, 1997, a person shall not apply any coating to a new wood product with a VOC content in excess of the following limits expressed as either grams of VOC per liter of coating (g/L) or (pounds of VOC per gallon of coating) (lb/gal), as applied, excluding water and exempt compounds:

<table>
<thead>
<tr>

Workshop Draft Rule 67.11
05/8/02 – SM:AD:ls
### (iv) On and after July 1, 2005, a person shall not apply the following low-solids coatings to a new wood product with a VOC content in excess of the following limit expressed as either grams of VOC per liter of material \((g/L)\) or (pounds of VOC per gallon of material) \((lb/gal)\), as applied:

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>VOC LIMITS</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>g/L</td>
</tr>
<tr>
<td>Low-Solids Stains, Toners or Wash Coats</td>
<td>480</td>
</tr>
</tbody>
</table>

The requirements of Subsection (d)(2) may be met using an Alternative Emission Control Plan (AECP) that has been approved pursuant to Rule 67.1.

### (3) VOC Limits for Refinished Wood Products

#### (i) Except as provided in Subsection (d)(3)(ii), a person shall not apply any coating to a refinished wood product with a VOC content in excess of the following limits expressed as either grams of VOC per liter of coating \((g/L)\) or (pounds of VOC per gallon of coating) \((lb/gal)\), as applied, excluding water and exempt compounds:

<table>
<thead>
<tr>

</tbody>
</table>

The requirements of Subsection (d)(3) may be met using an Alternative Emission Control Plan (AECP) that has been approved pursuant to Rule 67.1.

(4) VOC Limits for Large Coating Operations for New Wood Products

The requirements of this Subsection shall apply to a stationary source where the combined uncontrolled emissions of VOC from all new wood products coating operations, are greater than or equal to 25 tons in a calendar year.

(i) Except as provided in Subsection (d)(4)(ii), a person shall not apply any coating to a new wood product with a VOC content in excess of the limits in (d)(2)(i) and (d)(2)(ii) and the following limits, expressed as either grams of VOC per liter of coating (g/L), or pounds of VOC per gallon of material (lb/gal), as applied, less water and exempt compounds, or pounds of VOC per pound of solids (lb/lb), as applied:

<table>
<thead>
<tr>
<th>CATEGORY</th>

</tbody>
</table>

(ii) A person shall not apply the following coatings to a new wood product with a VOC content in excess of the following limits expressed as either grams of VOC per liter of material or pounds of VOC per gallon of material, as applied:
(iii) On or after July 1, 2005, a person shall not apply any coating to a new wood product with a VOC content in excess of the limits specified in (d)(2)(iii) and (d)(2)(iv).

The requirements of Subsection (d)(4) may be met using an Alternative Emission Control Plan (AECP) that has been approved pursuant to Rule 67.1.

(45) Surface Preparation and Stripping Materials

Except as provided in subsection (d)(56), a person shall not use VOC containing materials for surface preparation or stripping unless:

(i) The material contains 200 grams or less of VOC per liter of material; or

(ii) The material has an initial boiling point of 190°C (374°F) or greater; or

(iii) The material has a total VOC vapor pressure of 20 mm Hg or less, at 20°C (68°F).

(56) Cleaning of Application Equipment

A person shall not use VOC containing materials for the cleaning of application equipment used in operations subject to this rule unless:

(i) The cleaning material contains 200 grams or less of VOC per liter of material; or

(ii) The cleaning material has an initial boiling point of 190°C (374°F) or greater; or

(iii) The cleaning material has a total VOC vapor pressure of 20 mm Hg or less, at 20°C (68°F); or

(iv) The cleaning material is flushed or rinsed through the application equipment in a contained manner that will minimize evaporation into the atmosphere; or

(v) The application equipment or equipment parts are cleaned in a container which is open only when being accessed for adding, cleaning, or removing applica-
tion equipment or when cleaning material is being added, provided the cleaned equipment or equipment parts are drained to the container until dripping ceases; or

(vi) A system is used that totally encloses the component parts being cleaned during the washing, rinsing, and draining processes; or

(vii) Other application equipment cleaning methods that are demonstrated to be as effective as any of the equipment described above in minimizing the emissions of VOC to the atmosphere, provided that the device has been tested and approved by the Air Pollution Control Officer prior to use.

(67) No person shall require for use or specify the application of a coating subject to this rule if such use or application results in a violation of this rule. This prohibition shall apply to all written or oral contracts under the terms of which any coating is applied to any wood product at any location within San Diego County.

(78) Spray application equipment shall not be used to dispose of waste coatings or solvents into the air.

(e) CONTROL EQUIPMENT

(1) In lieu of complying with the provisions of Subsections (d)(2), (d)(3), (d)(4), (d)(5) and/or (d)(56) of this rule, a person may use an air pollution control system which:

(i) Has been installed in accordance with an Authority to Construct; and

(ii) Includes an emission collection system which captures organic gaseous emissions, including emissions associated with applicable coating, equipment cleaning, and surface preparation operations, and transports the captured emissions to an air pollution control device; and

(iii) Has a combined emissions capture and control device efficiency of at least 85 percent by weight; and

(iv) For coating operations subject to Subsection (d)(4), has a continuous monitoring system installed, operated, calibrated and maintained, as approved by the Air Pollution Control Officer. During wood product coating operations, the continuous monitoring system shall monitor and record all key system operating parameters necessary to ensure compliance with Subsection (e)(1)(iii) above at least every 15 clock minutes or a shorter period of time as determined necessary by the
Air Pollution Control Officer. Compliance with (e)(1)(iii) may be determined by
VOC emissions source testing and/or evaluating continuous monitor data.

(2) A person electing to use control equipment pursuant to Section (e)(1) shall
submit to the Air Pollution Control Officer for approval an Operation and Maintenance
plan for the proposed emission control device and emission collection system and receive
approval prior to operation of the control equipment. Thereafter, the plan can be
modified, with Air Pollution Control Officer approval, as necessary to ensure compliance.
Such plan shall:

(i) Identify all key system operating parameters. Key system operating para-

meters are those necessary to ensure compliance with Subsection (e)(1)(iii), such as
temperature, pressure, and/or flow rate; and

(ii) Include proposed inspection schedules, anticipated ongoing maintenance,
and proposed recordkeeping practices regarding the key system operating
parameters.

(3) Upon approval of the Air Pollution Control Officer, a person subject to the
requirements of Section (e) shall implement the Operation and Maintenance plan and shall
comply with the provisions of the approved plan thereafter.

(f) RECORDKEEPING

All records shall be retained on-site for at least three years and shall be made available to
the District upon request.

(1) Any person subject to the provisions of Subsections (d)(2), (d)(3), (d)(4), (d)(5)
and/or (d)(6) of this rule shall maintain records in accordance with the following:

(i) Maintain a current list of coatings, strippers, surface preparation and
cleaning materials in use which provides all of the VOC data necessary to evaluate
compliance, including but not limited to:

(A) Manufacturer name and identification for each coating or coating
component for multi-component coatings (this includes any components such
as bases, catalysts, thinners or reducers, when supplied in separate containers),
stripper, surface preparation and cleaning material; and

(B) Mix ratio of components; and
(C) VOC content expressed in either grams per liter (g/L), as applied, less water and exempt compounds, pounds per gallon (lb/gal), as applied, less water and exempt compounds, or pounds per pound of solids (lb/lb); vapor pressure; and/or initial boiling point, as applicable, for each coating, or coating component for multi-component coatings, stripper, surface preparation and cleaning material; and

(D) For each coating or coating component that contains VOCs and water or exempt compounds and that is used in a mixture with other VOC containing materials or is a low-solids stain, toner or wash coat, the weight of VOC per volume of material expressed in either grams per liter (g/L) or pounds per gallon (lb/gal), volume percent water and exempt compounds, or other information that the Air Pollution Control Officer finds is necessary to determine compliance with the VOC content standards of Subsections (d)(2), (d)(3), or (d)(4) of this rule.

(ii) Maintain current documentation to demonstrate applicability of any coating category pursuant to Subsection (d)(2), (d)(3), or (d)(4) of this rule.

(iii) At a minimum, maintain daily or monthly records of the amount of each coating or each coating component for multi-component coatings used.

(iv) At a minimum, maintain daily or monthly records of the amount of each stripper, surface preparation and cleaning material used.

(v) Maintain records of the dates and amounts of material added to coating dip tanks.

(2) Any person using control equipment pursuant to Section (e) of this rule shall:

(i) Maintain records in accordance with Subsection (f)(1); and

(ii) For all coatings, strippers, surface preparation and/or cleaning materials not in compliance with Subsections (d)(2), (d)(3), (d)(4), (d)(5), or (d)(6) of this rule, maintain daily records of the amount of each coating or each coating
component for multi-component coatings, stripper, surface preparation and cleaning material used; and

(iii) Maintain daily records of key system operating parameters as approved in the Operation and Maintenance plan. Such records shall be sufficient to document continuous compliance with Subsection (e)(1)(iii) during periods of emission producing activities.

(g) **TEST METHODS** *(Rev. Effective 8/13/97)*

(1) Perfluorocarbon (PFC) compounds shall be assumed to be absent from a coating, cleaning, or surface preparation material subject to this rule unless a manufacturer of the material or a facility operator identifies the specific individual compound(s) and the amount(s) present in the material and provides an EPA and ARB approved test method which can be used to quantify the specific compounds.

(2) Measurements of transfer efficiency subject to Subsection (d)(1)(vii) of this rule shall be conducted in accordance with the South Coast Air Quality Management District’s "Spray Equipment Transfer Efficiency Test Procedure for Equipment User," as it exists on June 27, 1995.

(3) Measurement of the VOC content of coatings, surface preparation and cleaning materials subject to Subsections (d)(2), (d)(3), (d)(4)(i), (d)(5)(i), or (d)(56)(i) of this rule shall be conducted in accordance with EPA Test Method 24 (40 CFR 60, Appendix A).

(4) Measurement of the VOC content of ultraviolet radiation-cured coatings subject to Subsections (d)(2), (d)(3), and/or (d)(4) of this rule shall be conducted in accordance with ASTM Standard Test Method D5403-93 (1998), or its most current version. Measurement of the water content and exempt solvent content, if applicable, shall be conducted and reported in accordance with ASTM Standard Test Methods D 3792-94a, D 4017-96a and/or D 4457-85 (1996) e1, or their most current versions.

(5) Measurement of the initial boiling point of cleaning and surface preparation materials subject to Subsection (d)(45)(ii) and/or (d)(56)(ii) of this rule shall be conducted in accordance with ASTM Standard Test Method D1078-9501, or its most current version for distillation range of volatile organic liquids.

(6) Calculation of total VOC vapor pressure for materials subject to Subsection (d)(45)(iii) and/or (d)(56)(iii) of this rule shall be conducted in accordance with the
If the vapor pressure of the liquid mixture, as calculated by this procedure, exceeds the limits specified in Subsection (d)(45)(iii) and/or (d)(56)(iii), the vapor pressure shall be determined in accordance with ASTM Standard Test Method D2879-9697, or its most current version. The solvent composition shall be determined using one of the following ASTM standard recommended practices: E 168-9299, E169-9399 or E 260-9496 (2001), or their most current versions. The fraction of water and exempt compounds in the liquid phase shall be determined by using ASTM Standard Test Methods D3792-9499 and D4457-85 (1996)e1, or their most current versions, and shall be used to calculate the partial pressure of water and exempt compounds. The results of vapor pressure measurements obtained using ASTM Test Method D2879-9697 shall be corrected for partial pressure of water and exempt compounds.

(7) Measurement of solvent losses from alternative application cleaning equipment subject to Subsection (d)(56)(vii) shall be conducted and reported in accordance with the South Coast Air Quality Management District’s "General Test Method for Determining Solvent Losses from Spray Gun Cleaning Systems," as it exists on June 27, 1995.

(8) Measurement of control device efficiency subject to Subsection (e)(1) of this rule shall be conducted in accordance with EPA Methods 18 and/or 25A (40 CFR 60) and in accordance with a protocol approved by the Air Pollution Control Officer.

(9) Measurement of the emission collection system capture efficiency subject to Subsection (e)(1)(iii) of this rule shall be determined according to EPA’s Method 204 and Method 204A-F “Capture Efficiency” (40 CFR 51, Appendix M) and EPA’s technical document, "Guidelines for Determining Capture Efficiency", dated January 9, 1995, using a protocol approved by the Air Pollution Control Officer. Subsequent to the initial compliance demonstration period, applicable key system operating parameters, as approved by the Air Pollution Control Officer, may be used as verification that capture efficiency has not diminished.

(10) Determination of the solids content of coatings, stains, and toners pursuant to Subsections (c)(15), (c)(18), (c)(19), (c)(31), and (c)(39) of this rule shall be conducted in accordance with EPA Test Method 24 (40 CFR 60, Appendix A).
PROPOSED NEW RULE 67.11.1

Proposed new Rule 67.11.1 is to read as follows:

RULE 67.11.1 LARGE COATING OPERATIONS FOR WOOD PRODUCTS
(Adopted & Effective date of adoption)

(a) APPLICABILITY

(1) Except as otherwise provided in Section (b), this rule is applicable to a stationary source where the combined uncontrolled emissions of VOCs from all wood product coating operations, including emissions from equipment cleaning, are greater than or equal to 25 tons in a calendar year.

(2) Any coating operation subject to the requirements of Rules 67.0 or 67.18 shall not be subject to this rule.

(3) Rule 66 shall not apply to any coating operation which is subject to Sections (d) or (e) of this rule.

(b) EXEMPTIONS

(1) The provisions of Sections (d), (e), and (f) shall not apply to coatings applied using non-refillable handheld aerosol spray containers.

(2) The provisions of Subsection (d)(1) shall not apply to the following:

   (i) Any coatings when applied by the use of air brushes with a coating capacity of two ounces (59.1 ml) of less.

   (ii) Any coatings when applied during touch-up operations.

(3) The provisions of Subsection (d)(2) shall not apply to coatings applied to wooden musical instruments.

(c) DEFINITIONS

For the purposes of this rule, the following definitions shall apply:

(1) "Adhesive" means a material applied to a wood surface for the sole purpose of bonding the wood surface with another wood or non-wood surface by attachment.

(2) "Binder" means a non-volatile polymeric organic material, such as a resin, which forms the surface film during coating applications.
(3) "Clear Sealer" means a coating which contains binders, but not opaque pigments, and is specifically formulated to seal wood surfaces prior to the application of subsequent coatings.

(4) "Clear Topcoat" means a final coating which contains binders, but not opaque pigments, and is specifically formulated to form a transparent or translucent solid protective film. Clear topcoats include clear lacquers and varnishes, but exclude conversion varnishes.

(5) "Coating" means a material containing more than 20 grams per liter of VOC as applied, less water and exempt compounds, which can be applied as a thin layer to a substrate, and which dries or cures to form a continuous solid film, including but not limited to any paint, sealer, varnish, or lacquer, and excluding any adhesives. Coating also includes stains, inks, fillers, wash coats, and toners.

(6) "Coating Operation" means all steps involved in the application, drying and/or curing of surface coatings, including touch-up operations, and associated stripping, surface preparation and coating application equipment cleaning.

(7) "Conversion Varnish" means a topcoat which is comprised of a homogeneous liquid (alkyd-amino resin), which when acid catalyzed and applied, hardens by evaporation and polymerization.

(8) "Dip Coat" means a coating application method accomplished by dipping an object into the coating material.

(9) "Electrostatic Spray" means a coating application method accomplished by charging atomized paint particles for deposition by electrostatic attraction.

(10) "Exempt Compound" means the same as defined in Rule 2.

(11) "Filler" means a material used to fill in cracks, grains and imperfections of wood before applying a coating.

(12) "Flow Coat" means a coating application method accomplished by flowing a stream of coating over an object.

(13) "Glaze Stain" means a semi-transparent tinted coating applied on a previously coated surface to produce a decorative effect.

(14) "Hand-Application Method" means a coating application method accomplished by applying a coating by manually held, non-mechanically operated equipment. Such equipment includes paintbrushes, hand rollers, rags, and sponges.

(15) "High-Solid Stain" means a stain containing more than one pound of solids per gallon of material.
(16) "High-Volume Low-Pressure (HVLP) Spray" means a coating application method which uses pressurized air at a permanent pressure between 0.1 and 10.0 psig, not to exceed 10.0 psig, measured at the air cap of the coating application system.

(17) "Ink" means a liquid that contains dyes and/or colorants and is used to make markings, but not to protect surfaces.

(18) "Low-Solids Coating" means a coating containing one pound of solids or less per gallon of material.

(19) "Low-Solids Stain" means a stain containing one pound of solids or less per gallon.

(20) "Medium Density Fiberboard (MDF) Coating" means the initial coating which is applied directly to the surface of MDF, which is a wood product composed of tightly compressed wood fibers bonded with resins, and has a density greater than 45 pounds per cubic foot.

(21) "Multi-Colored Coating" means a coating which exhibits more than one color when applied and which is packaged in a single container and applied in a single coat.

(22) "Pigmented Primer, Sealers, and Undercoats" means opaque coatings which contain binders and colored pigments formulated to hide the wood surface, that are applied prior to the topcoat to provide a firm bond, level the wood product surface, or seal the wood product surface.

(23) "Pigmented Topcoat" means a final opaque coating which contains binders and colored pigments, and is specifically formulated to hide the wood surface and form a solid protective film.

(24) "Roll Coat" means a coating application method accomplished by rolling a coating onto a flat surface using a roll applicator.

(25) "Stationary Source" means the same as defined in rule 2.

(26) "Stripper" means a liquid applied to remove a coating or coating residue.

(27) "Toner" means a coating which contains not more than one pound of binders and dyes or pigments per gallon of coating and which is used to add tint to a coated surface.

(28) "Touch-up Operation" means the portion of a coating operation which is incidental to the main coating process but necessary to cover minor imperfections or minor mechanical damage incurred prior to intended use, or to achieve coverage as required.
(29) "Transfer Efficiency" means the ratio of the weight of coating solids adhering to the part being coated to the weight of coating solids used in the application process expressed as a percentage.

(30) “Uncontrolled VOC Emissions” means VOC emissions from a wood products coating operation, before application of add-on air pollution control equipment or process modification.

(31) "Volatile Organic Compound (VOC)" means the same as defined in Rule 2.

(32) "VOC Content Per Pound of Coating Solids" means the weight of VOC per weight of coating solids in any given coating volume of coating and can be calculated by the following equation:

\[
C_s = \frac{W_s - W_w - W_{es}}{W_r}
\]

where:

- \(C_s\) = VOC content per pound of coating solids
- \(W_s\) = Weight of volatile compounds, in pounds
- \(W_w\) = Weight of water, in pounds
- \(W_{es}\) = Weight of exempt compounds, in pounds
- \(W_r\) = Weight of coating solids, in pounds

(33) "VOC Content Per Volume of Coating, Less Water and Exempt Compounds" means the same as defined in Rule 2.

(34) "VOC Content Per Volume of Material" means the same as defined in Rule 2.

(35) "Wash Coat" means a coating containing not more than one pound of solids per gallon, which is used to seal wood surfaces, prevent undesired staining and control penetration. A wash coat may also be used to provide a barrier coat when paper laminates are applied to the wood surface, or when glazes are applied during the coating operation.

(36) "Wood Products" means any objects that are made of or primarily fabricated with solid wood, wood composition, bamboo and/or rattan, including furnishings, art objects, tables, chairs, beds, sofas, and shutters and cabinets which are not permanently attached to stationary structures at the time of coating.

(d) STANDARDS

(1) Application Methods
Except as provided in Subsection (b)(2), a person shall not apply coatings unless one of the following application methods is used:

(i) Hand-application method, or
(ii) Dip coat, or
(iii) Roll coat, or
(iv) Flow coat, or
(v) Electrostatic coat, or
(vi) High-volume low-pressure (HVLP) coat, or
(vii) Other coating application methods that are demonstrated to have a transfer efficiency at least equal to one of the above application methods, and which are operated in such a manner that the parameters under which they were tested are permanent features of the method. Such coating application methods shall be approved in writing by the Air Pollution Control Officer prior to use.

(2) VOC Limits

(i) Except as provided in Section (b), a person shall not apply any coating to a new wood product with a VOC content in excess of the following limits, expressed as either grams of VOC per liter of coating (g/L), or pounds of VOC per gallon of material (lb/gal), as applied, less water and exempt compounds, or pounds of VOC per pound of solids (lb/lb), as applied:

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>VOC LIMITS</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>g/L</td>
</tr>
<tr>
<td>Clear Sealers</td>
<td>550</td>
</tr>
<tr>
<td>Clear Topcoat</td>
<td>550</td>
</tr>
<tr>
<td>Conversion Varnishes</td>
<td>550</td>
</tr>
<tr>
<td>Fillers</td>
<td>500</td>
</tr>
<tr>

<td>550</td>
</tr>
<tr>
<td>Pigmented Topcoats</td>
<td>550</td>
</tr>
<tr>
<td>Any Other Coating</td>
<td>420</td>
</tr>
</tbody>
</table>

(ii) Except as provided in Section (b), a person shall not apply the following coatings to a new wood product with a VOC content in excess of the following limits expressed either as grams of VOC per liter of material or pounds of VOC per gallon of material, as applied:

<table>
<thead>
<tr>
<th>COATING</th>
<th>VOC LIMITS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low-Solids Stains, Toners, and Wash Coats</td>
<td>480</td>
</tr>
</tbody>
</table>

The requirements of Subsection (d)(2) may be met using an Alternative Emission Control Plan (AECP) that has been approved pursuant to Rule 67.1.

(3) Surface Preparation Materials

A person shall not use VOC containing materials for surface preparation, including stripping, unless:
(i) The material contains 200 grams or less of VOC per liter of material; or

(ii) The material has an initial boiling point of 190°C (374°F) or greater; or

(iii) The total VOC vapor pressure of the material is 20 mm Hg or less at 20°C (68°F).

(4) Cleaning of Coating Application Equipment

A person shall not use VOC containing materials for the cleaning of application equipment used in operations subject to this rule unless:

(i) The cleaning material contains 200 grams or less of VOC per liter of material; or

(ii) The cleaning material has an initial boiling point of 190°C (374°F) or greater; or

(iii) The cleaning material has a total VOC vapor pressure of 20 mm Hg or less at 20°C (68°F); or

(iv) The cleaning material is flushed or rinsed through the application equipment in a contained manner that will minimize evaporation into the atmosphere; or

(v) The application equipment or equipment parts are cleaned in a container which is open only when being accessed for adding, cleaning, or removing application equipment or when cleaning material is being added, provided the cleaned equipment or equipment parts are drained to the container until dripping ceases; or

(vi) A system is used that totally encloses the component parts being cleaned during the washing, rinsing, and draining processes; or

(vii) Other application equipment cleaning methods that are demonstrated to be as effective as any of the equipment described above in minimizing the emissions of VOC to the atmosphere, provided that the device has been tested and approved in writing prior to use by the Air Pollution Control Officer.

(5) No person shall require for use or specify the application of a coating subject to this rule if such use or application results in a violation of this rule. This prohibition shall apply to all written or oral contracts under the terms of which any coating is applied to any wood product at any location within San Diego County.

(6) Spray application equipment shall not be used to dispose of waste coatings or solvents into the air.
(e) CONTROL EQUIPMENT

(1) In lieu of complying with the provisions of Subsections (d)(2), (d)(3), and/or (d)(4) of this rule, a person may use an air pollution control system which:

(i) Has been installed in accordance with an Authority to Construct; and

(ii) Includes an emission collection system which captures organic gaseous emissions, including emissions associated with applicable coating operations, and/or equipment cleaning and surface preparation operations, and transports the captured emissions to an air pollution control device; and

(iii) Has a combined emissions capture and control device efficiency of at least 85% by weight; and

(iv) Has a continuous monitoring system installed, operated, calibrated and maintained, as approved by the Air Pollution Control Officer. During wood product coating operations, the continuous monitoring system shall monitor and record all key system operating parameters necessary to ensure compliance with Subsection (e)(1)(iii) above at least every 15 clock minutes or a shorter period of time as determined necessary by the Air Pollution Control Officer. Compliance with (e)(1)(iii) may be determined by VOC emissions source testing and/or evaluating continuous monitor data.

(2) A person electing to use an air pollution control system pursuant to Section (e)(1) shall submit to the Air Pollution Control Officer for approval an Operation and Maintenance plan for the proposed emission control device and emission collection system and receive approval prior to operation of the control equipment. Thereafter, the plan can be modified with Air Pollution Control Officer approval, as necessary, to ensure compliance. Such plan shall:

(i) Identify all key system operating parameters. Key system operating parameters are those necessary to ensure compliance with Subsection (e)(1)(iii) such as temperature, pressure, and/or flow rate; and

(ii) Include proposed inspection schedules, anticipated ongoing maintenance, and proposed recordkeeping practices regarding the key system operating parameters.

(3) Upon approval of the Air Pollution Control Officer, a person subject to the requirements of Section (e) shall implement the Operation and Maintenance plan and shall comply with the provisions of the approved plan thereafter.

(f) RECORDKEEPING

All records required by this rule shall be retained on-site for at least three years and be made available to the District upon request.
Any person subject to the provisions of Subsection (d)(2), (d)(3), and/or (d)(4) of this rule shall maintain records in accordance with the following:

(i) Maintain a current list of coatings, strippers, surface preparation and cleaning materials in use which provides all of the VOC data necessary to evaluate compliance, including but not limited to:

(A) The manufacturer name and identification for each coating or coating component for multi-component coatings (this includes any components such as bases, catalysts, thinners or reducers, when supplied in separate containers), stripper, surface preparation, and cleaning material; and

(B) Mix ratio of components; and

(C) VOC content expressed in either grams per liter (g/L), as applied, less water and exempt compounds, pounds per gallon (lb/gal), as applied, less water and exempt compounds, or pounds per pound of solids (lb/lb); vapor pressure; and/or initial boiling point, as applicable, for each coating, or coating component for multi-component coatings, stripper, surface preparation and cleaning material; and

(D) For each coating or coating component that contains VOCs and water or exempt compounds and that is used in a mixture with other VOC containing materials or is a low-solids stain, toner or wash coat, the weight of VOC per volume of material expressed in either grams per liter (g/L) or pounds per gallon (lb/gal), volume percent water and exempt compounds, or other parameters that the Air Pollution Control Officer finds is necessary to determine compliance with the VOC content standards of Subsections (d)(2), (d)(3), or (d)(4) of this rule.

(ii) Maintain current documentation to demonstrate applicability of any coating category pursuant to Subsection (d)(2) of this rule.

(iii) At a minimum, maintain monthly records of the amount of each coating or each coating component for multi-component coatings used.

(iv) At a minimum, maintain monthly records of the amount of each stripper, surface preparation and cleaning material used.

(v) Maintain records of the dates and amounts of material added to coating dip tanks.

(2) For each material that is not in compliance with Subsections (d)(2) maintain daily usage records for all coatings, thinners, and other VOC containing materials.

(3) Any person using control equipment pursuant to Section (e) of this rule shall:

(i) Maintain records in accordance with Subsection (f)(1); and
For all coatings, strippers, surface preparation and/or cleaning materials not in compliance with Subsection (d)(2), (d)(3), or (d)(4) of this rule, maintain daily records of the amount of each coating or each coating component for multi-component coatings, stripper, surface preparation and cleaning material used; and

Maintain records of all monitoring pursuant to Subsection (e)(1)(iv) and all other data necessary to demonstrate compliance with control requirements as determined by the Air Pollution Control Officer.

(g) TEST METHODS

(1) Perfluorocarbon (PFC) compounds shall be assumed to be absent from a coating, cleaning, or surface preparation material subject to this rule unless a manufacturer of the material or facility operator identifies the specific individual compound(s) and the amount(s) present in the material and provides an EPA and ARB approved test method which can be used to quantify the specific compounds.

(2) Measurements of transfer efficiency subject to Subsection (d)(1)(vii) of this rule shall be conducted in accordance with the South Coast Air Quality Management District's "Spray Equipment Transfer Efficiency Test Procedure for Equipment User," as it exists on June 27, 1995.

(3) Measurement of the VOC content of coatings, surface preparation and cleaning materials subject to Subsections (d)(2), (d)(3)(i), or (d)(4)(i) of this rule shall be conducted in accordance with EPA Test Method 24 (40 CFR 60, Appendix A).

(4) Measurement of the VOC content of ultraviolet radiation-cured coatings subject to Subsection (d)(2) of this rule shall be conducted in accordance with ASTM Standard Test Method D5403-93(1998), or its most current version. Measurement of the water content and exempt solvent content, if applicable, shall be conducted and reported in accordance with ASTM Standard Test Methods D3792-99, D4017-96a or D4457-85(1996)e1, or their most current versions.

(5) Measurement of the initial boiling point of cleaning and surface preparation materials subject to Subsections (d)(3)(ii) or (d)(4)(ii) of this rule shall be conducted in accordance with ASTM Standard Test Method D1078-01, or its most current version, for distillation range of volatile organic liquids.

(6) Calculation of total VOC vapor pressure for materials subject to Subsections (d)(3)(iii) or (d)(4)(iii) of this rule shall be conducted in accordance with the District's "Procedures for Estimating the Vapor Pressure of VOC Mixtures." If the vapor pressure of the liquid mixture, as calculated by this procedure, exceeds the limits specified in Subsections (d)(3)(iii) or (d)(4)(iii), the vapor pressure shall be determined in accordance with ASTM Standard Test Method D2879-97, or its most current version. The solvent composition shall be determined using ASTM Standard Practice E168-99, E169-99, or E260-96(2001), or their most current versions. The fraction of water and exempt compounds in the liquid phase shall be determined by using ASTM Standard Test
Methods D3792-99 and D4457-85(1996)e1, or their most current versions, and shall be used to calculate the partial pressure of water and exempt compounds. The results of vapor pressure measurements obtained using ASTM Test Method D2879-97, or its most current version shall be corrected for partial pressure of water and exempt compounds.

(7) Measurement of solvent losses from alternate application cleaning equipment subject to Subsection (d)(4)(vii) shall be conducted and reported in accordance with the South Coast Air Quality Management District's "General Test Method for Determining Solvent Losses from Spray Gun Cleaning Systems," as it exists on December 16, 1998.

(8) Measurement of the emission collection system capture efficiency subject to Subsection (e)(1)(iii) of this rule shall be determined according to EPA Method 204 and Method 204A-F "Capture Efficiency" (40 CFR 51, Appendix M) and EPA’s "Guidelines for Determining Capture Efficiency " dated January 9, 1995, using a protocol approved in writing by the Air Pollution Control Officer. Subsequent to the initial compliance demonstration period, applicable key system operating parameters, as approved by the Air Pollution Control Officer, may be used as verification that capture efficiency has not diminished.

(9) Measurements of control device efficiency subject to Subsection (e)(1) of this rule shall be conducted in accordance with EPA Methods 18 and/or 25A (40 CFR 60, Appendix A) and in accordance with a protocol approved in writing by the Air Pollution Control Officer.

(10) Determination of the solids content of coatings, stains and toners pursuant to Subsections (c)(15), (c)(18), (c)(19), (c)(27) and (c)(35) of this rule shall be conducted in accordance with EPA Test Method 24 (40 CFR 60, Appendix A).
