

Air Improvement Relief Effort

In-home air purifiers help improve indoor air quality by reducing pollutants and odors. Below is helpful information about your air purifier and best use tips to get the most out of your air purifier.

About Your Air Purifier

You have received an Oransi air purifier that has the capacity to filter air in a room up to 1,756 square feet in 60 minutes and is certified by the California Air Resources Board. For more information on how to operate your air purifier, see the manufacturer's guidance.

Best Use Tips

- Place the unit where you will spend the most time.
- Place it away from doors, windows, and walls to allow air to easily flow in the unit.
- Place on a flat surface for stability.

Replacing the Filter

Along with your air purifier, you have received two replacement filters. Filter replacement is recommended after 12 months of continuous use. Additional filters can be purchased at: Oransi.com, Amazon.com and Walmart.com
