

San Diego APCD
Emissions Inventory Request Form Instructions

HAUL ROADS

Please refer to the general instructions for guidance regarding the following sections: Reporting Year, Facility Identification, Permit Information, Device Information, Stack / Ducted Emissions and Fugitive Release Emissions.

MATERIAL/ PROCESS INFORMATION

Fill in all the data fields. Complete all blanks using the specified units. Use a separate form to report each truck and material combination. Copy the blank form as needed. On forms with pre-printed process information from a previously submitted inventory, asterisks (*) highlight data fields that must be updated.

Type of Material Hauled: Describe the material hauled (i.e., product, import, export, cover material, etc.).

Amount Hauled (tons/year): Report the total amount of material hauled by this truck type for the reporting year.

Unpaved Road Information: Report the length of a round trip to the nearest tenth of a mile. The silt content units are weight percent of silt in the road surface sample. If the silt content is unknown, the District will use a default value.

Paved Road Information: Report the length of a round trip to the nearest tenth of a mile. The silt loading units are ounces of silt per square yard of road surface debris samples. If the silt loading is unknown, the District will use a default value.

Device Operating Schedule:

Daily Operation (hours/day): Report the average amount of hours the device operates in a typical day.

Weekly Operation (days/week): Report the average number of days the device operates in a typical week.

Annual Operation (days/year): Report the number of days the device operated during the Reporting Year.

POLLUTANT NAME (ppmw)

If available, provide site-specific information with supporting documentation in units of parts of pollutant per million parts PM10 by weight (ppmw). Default emission factors will be used to estimate emissions where site-specific information is not available or not documented.
