In response to Assembly Bill (AB) 617 (C. Garcia, 2017), the California Air Resources Board (CARB) established the Community Air Protection Program (Program). The Program’s mission is to reduce pollution exposure in communities based on environmental, health and socioeconomic information. This first-of-its-kind statewide effort will require community air monitoring, community emission reduction plans, and incentive funding to deploy the cleanest technologies in the most impacted areas. The Portside community was selected by CARB to identify and reduce air pollutants in the community. These public webinars are intended to present and discuss the proposed draft Community Emissions Reduction Plan (CERP) to reduce emissions in these communities.
